Digital photography for beginners can be confusing. Exposure isn't as simple as learning about aperture, shutter speed, and ISO. You also have to learn about how your camera looks at light. Metering modes are there to tell your camera how you want it to look at a scene. The picture below was taken on spot metering mode. If you were to take the same photo using the evaluative mode, you would end up with a completely different exposure.

Photography for Beginners (The Ultimate Guide in 2020)

The beauty of digital is that you can take a shot, and then review it on the LCD. Quickly reviewing your image is much easier than pulling out your phone and calculating DoF! If you don't get the result you are looking for, change your camera-subject distance or the lens aperture to get the desired effect.

A Beginner's Guide - Photography Life

Photography is the art of capturing light with a camera, usually via a digital sensor or film, to create an image. With the right camera equipment, you can even photograph wavelengths of light invisible to the human eye, including UV, infrared, and radio.

1. ISO Speed - determines the digital sensors sensitivity to light and the amount of "grain" in your pictures. When there is lots of light e.g. sunny day, set your camera ISO speed to 100-200. If you want to shoot inside without using a flash, then set your camera to ISO 400, 800, 1600 or higher. The higher the ISO speed the grainier your image will be.

Joe says: "The LIFE Guide is just that—a guide. It can take a newbie right from opening the box containing the new digital picture machine right through composition, light, lenses, and color." One of my favorite photo books to flip through is The Great LIFE Photographers, which was a gift from my father-in-law (thanks, David). The Great LIFE Photographers shares hundreds of photos from dozens of LIFE photographers; however, the downside to that is the brevity of each photographer's ...
