Tire Tread and Tire Track Evidence:

Recovery and Forensic ..

Tire impressions reflect the tread design and dimensional features of the individual tires on a vehicle. If properly collected the tire tread impression is extremely valuable in proving a suspect vehicle was present at a crime scene. Tire track evidence can:

Positively match a suspect vehicle;

Determine the wheelbase or turning diameter of a vehicle

and Tire Track ... And Forensic

New tires typically start with a tread depth of 10/32" to 12/32", with some off-road tires topping 15/32". New tire tread depth is the measurement typically published by tire manufacturers, but it's not the same as usable tire tread depth. Most states and tire manufacturers consider tires to be bald when one or more of their grooves are worn down to 2/32". So, if you start with a new tire tread depth of 10/32", the actual usable tread depth is 8/32".

Tire Tread Depth: Why It Matters and How to Measure It ...

Tread patterns are often classified by the design of their ribs, blocks, lugs and/or grooves that have allowed engineers to tune the tire's traction, handling and noise. Tread pattern: includes multiple ribs, blocks, lugs or a combination of all three. The most common passenger and light

Tire Tech Information - Shaving Tires for
Autocross / Track Use / Competition ☐
shaved new tire will provide more traction
than a tire worn to the exact same tread
depth after being driven for thousands of
miles on the road. Tire shaving is an
effective means of permitting more of a
tire's performance capability to be realized
early in its life.

Tire Tread Shaving at Tire Rack

Get Free Tire Tread And Tire Track Evidence

The tread of a tire or track refers to the rubber on its circumference that makes contact with the road or the ground. As tires are used, the tread is worn off, limiting its effectiveness in providing traction. A worn tire can often be retreaded.. The word tread is often used casually to refer to the pattern of grooves molded into the rubber, but those grooves are correctly called the tread ...

Tire tread - Wikipedia

Tire tread is the lined or blocked pattern on the surface of a tire that provides traction for the tire. Often referred to as a caterpillar track, tread is found on the tire of any automobile. The tread pattern differs with different tires and different automobiles, but the use is the same. A vehicle tire with deep treads.
